

Feather Removal Machine FRM-3Q

The economic and mechanical way of removing quail feathers.

Features and benefits

- Increased the number of birds processed per day
- Compact gearbox
- Less energy consumption
- Remove feathers without any major damage to the quail
- Stainless Steel body
- Easy to use and maintain

Description

The defeathering machine is developed for removing the feathers from several types of poultry, the machine is equipped with "Silicon fingers" specifically designed to beat off the feathers.

- The silicon fingers are a long life, more dress rate than other brand and finest quality Ultra-soft plucking
- Motor gearbox drive a high power from the motor with compact size
- Made from stainless steel structure and body cover the food grade requirements.
- The plastic basket collecting feather makes it easy in management and filters the feathers from the washing water.

Specifications

- Loading capacity 3KG
- Working capacity 250 birds/hour (Estimated at 1KG bird weight)

Dimensions

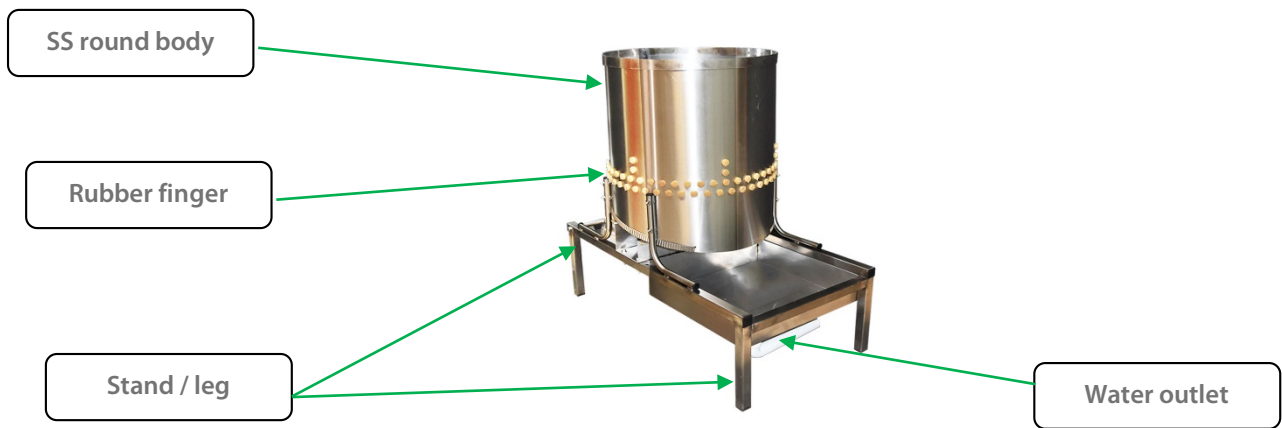

- Overall Height .925 m
- Overall Width .501 m
- Overall Depth .905 m (Note: all dimensions subject to change without notice)

Body and construction

- Stainless steel 304.

Connections

- Power 700 Watt, 0.5HP
- Voltage 230 V / 50 Hz (earth required)
- Water supply 1/2" hose
- Water drainage 1 1/2" with ball valve shut-off

All photographs, measurements, and descriptions are provided without engagement. We reserve the right to make modifications at any time
