

# Infrared Gas Heater

Widest range of gas heating equipment for applications in the poultry

## Features and benefits

- Low maintenance safety and reliable
- High quality, durability and comfortable warm
- Washable with air pressure or water
- Quick heat-up time
- Return of investment in just a few number of heater
- High energy efficiency: up to 30%-40% energy savings compared with conventional system
- Lightweight easy to shift at any place

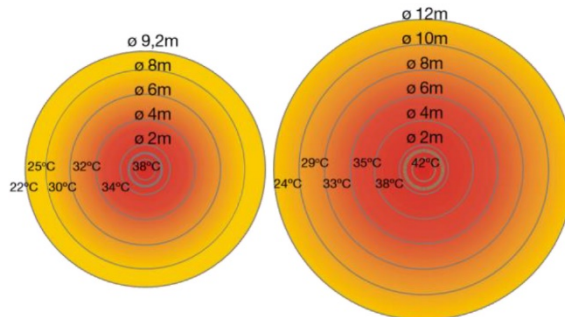

# Description

Infrared gas brooder with double radiating surface of stainless steel sheet for medium and large poultry installation.

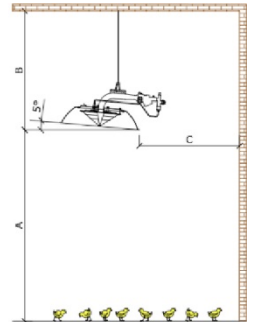

# Technical features

Features:	5BP	10BP
Capacity (kW)	0.55 / 4.80	1.15 / 10
Propane gas (g/h)	40 / 346	85 / 722
Consumption	0.045 / 0.393	0.095 / 0.819
Working pressure (mbar)	20 / 300	20 / 300
Minimum distances recommended		
A	1.60	2,00
B	0.75	
C	1.50	2.50
Coverage in number of animals (*)		
Broilers	1500 / 1800	2500 / 3000
Turkeys	700	975
Ducks	400	860

Average temperatures obtained under ideal conditions, with a air

Detail of hanging position brooder

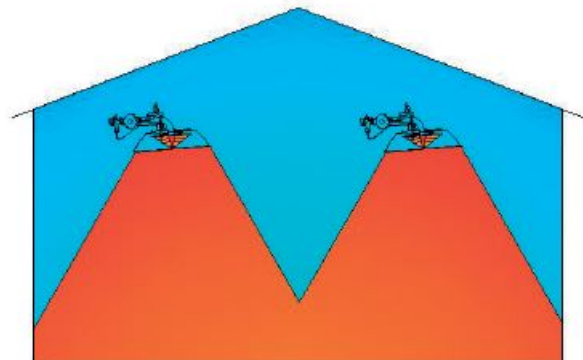

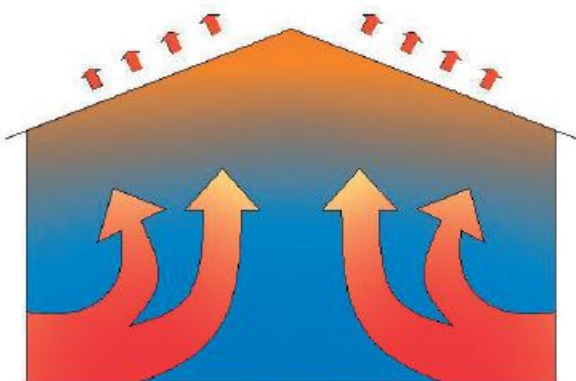

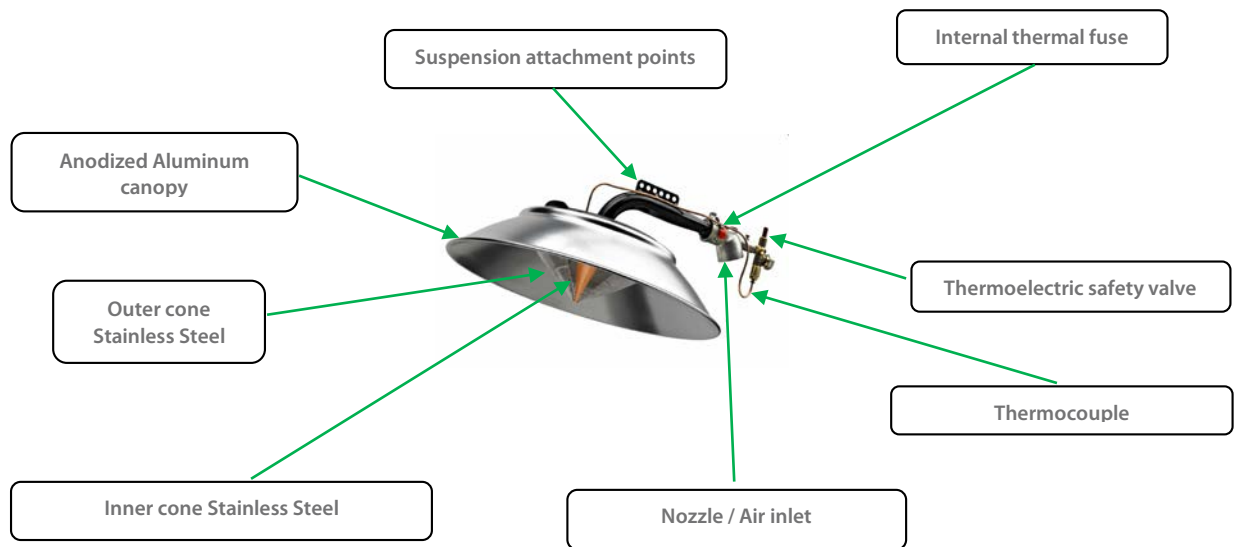

temperature close to 22 °C.

This information may vary slightly according to the degree of insulation of the building and the total number of gas heater running at any one time.
